

## Task 13.3 Sensitivity tests

We will specify and run a series of sensitivity tests. Eg:

- ❑ public transport fares: 20% changes in all PT fares, rail fares only, bus fares only;
- ❑ public transport in-vehicle times: 20% changes in PT times, rail times only, bus times only;
- ❑ public transport frequencies: 20% changes for all PT, rail only, bus only;
- ❑ car operating costs or fuel costs: 20% change;
- ❑ car in-vehicle times: 20% change;
- ❑ CBD parking charges: nature of test needs to be thought through.

We will declare in advance what would be satisfactory outputs for each test (ranges).
