

## Task 7.3 Create Trip Attraction Analysis Files

### *Inputs*

Household survey  
External survey (road)  
PT surveys  
School survey  
Land use data for 2001

### *Processing*

Specify required file contents for trip attraction analyses.

Create a flat file, 1 record per zone including:

- residents internal all-mode trips attractions by purpose from the household survey by purpose;
- non-residents internal attractions by purpose from the external road survey and public transport survey;
- zonal characteristics from the land use data;
- add any other zonal information of interest (zone types, type of retail destination, presence of major recreational attractors, urban/rural etc).

### *Outputs*

Documented flat file.
