

Task 7.5 External Trip Processing and Forecasting

Inputs

Roadside cordon and public transport intercept surveys

Processing

The external trips ends for each purpose are required in production and attraction form from the surveys.

These trip ends cannot be related to planning data (as the external area is not represented by a zone system) so a growth factor procedure is required. Unless there is a case for doing otherwise, some very simple approach should be sufficient (eg based on the average region-wide growth in the study area).

Outputs

Growth factors.

Report.
